Financial Report
For the Three and Nine Months Ended
September 30, 2026

Note: This report is intended to be read in conjunction with our Annual Report to Stockholders for the year ended December 31, 2025, copies of which are included on this website. This report is dated September 30, 2026, and should not be read to cover any subsequent periods. We specifically disclaim any obligation to update this report even if the contents thereof should become misleading.

This report has not been prepared in accordance with Securities and Exchange Commission rules applicable to public companies and is not intended to comply with such rules.

Status as Non-Reporting Company. We are not subject to the reporting requirements of Section 13 of the Securities Exchange Act of 1934 and accordingly this report has not been prepared in accordance with applicable Securities Exchange Commission rules. This report is intended to cover the three and nine month periods ended September 30, 2026 and should not be read to cover any other periods.

Notes to Consolidated Financial Statements. The accompanying unaudited consolidated financial statements have been prepared based on accounting principles generally accepted in the United States of America and in the opinion of management contain all adjustments (all of which are normal and recurring in nature) necessary for a fair presentation. The results of operations for the nine months ended September 30, 2026, are not necessarily indicative of the results expected for the year ending December 31, 2026. The September 30, 2026, consolidated financial statements should be read in conjunction with the consolidated financial statements and notes for the year ended December 31, 2025, included in the Company's Annual Report. The Company's consolidated statement of condition as of December 31, 2025, has been derived from the Company's audited consolidated statement of condition as of that date.

The preparation of the consolidated financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that could have a material effect on the carrying value of certain assets and liabilities. These estimates and assumptions affect the amounts reported in the consolidated financial statements and the disclosures provided. The determination of the allowance for credit losses, valuations and impairments of investment securities, and the accounting for income tax expense are highly dependent on management's estimates and assumptions where changes in any of these could have a significant impact on the financial statements.

The consolidated financial statements include the accounts of AMB Financial Corp. (the "Company"), and its wholly owned subsidiary, American Community Bank of Indiana (the "Bank").

Earnings per Share. Earnings per share for the three and nine month periods ended September 30, 2026, and 2025, were determined by dividing net income available to common shareholders for the periods by the weighted average number of both basic and diluted shares of common stock, as well as common stock equivalents outstanding.

Reclassifications. Certain 2025 items or amounts may have been reclassified or restated to conform to the 2026 presentation.

Management's Discussion and Analysis of Financial Condition and Results of Operations

Forward-Looking Statements. The Company and the Bank may from time to time make written or oral "forward-looking statements." These forward-looking statements may be included in this Financial Report, which are made in good faith by us. These forward-looking statements include statements about our beliefs, plans, objectives, goals, expectations, anticipations, estimates and intentions, which are subject to significant risks and uncertainties, and are subject to change based on various factors, some of which are beyond our control. The words "may," "could," "should," "would," "believe," "anticipate," "estimate," "expect," "intend," "plan" and similar expressions are intended to identify forward-looking statements. The following factors, among others, could cause our financial performance to differ materially from the plans, objectives, expectations, estimates, and intentions expressed in the forward-looking statements:

- The current condition of the United States economy in general and in our local economy (including unemployment) in which we conduct operations;
- the effects of, and changes in, trade, monetary and fiscal policies, and laws, including interest rate policies of the Federal Reserve Board and the United States Treasury ("UST");
- our ability to manage and reduce our non-performing assets;
- our ability to repay our holding company debt, including our $3 million of trust preferred stock, when due;
- the impact of new laws and regulations on financial institutions, the lending market, and our regulatory agencies;
- the impact of new regulations imposed by the Federal Reserve System, the Federal Deposit Insurance Corporation ("FDIC") and the State of Indiana Department of Financial Institutions;
- future deposit premium levels;
- future loan underwriting and consumer protection requirements including those issued by the Consumer Financial Protection Bureau;
- inflation, interest rate, market and monetary fluctuations and its impact on our interest rate sensitive balance sheet;
- the future financial strength, dividend level and activities of the FHLB of Indianapolis in which we own stock and from which we borrow money;
- the timely development of and acceptance of our new products and services and the perceived overall value of these products and services by users, including the features, pricing and quality thereof compared to competitors' products and services;
- the willingness of users to substitute our products and services for products and services of our competitors;
- our ability to reinvest our cash flows in today's interest rate environment;
- our success in gaining regulatory approval of our products and services, when required;
- the impact of changes in financial services' laws and regulations (including laws concerning taxes, banking, securities, and insurance);
- the impact of technological changes;
- competition from other financial service providers in the Company's market area;
- the success of our executives in managing our business operations;
- the success of our loan restructuring and work out arrangements;
- our ability to accurately estimate the value of our assets and the appropriate level of our allowance for credit losses;
- future changes in consumer spending and saving habits; and
- our ability to lease space in our branch facilities when vacancies occur;

The list of important factors stated above is not exclusive. We do not undertake to update any forward-looking statement, whether written or oral, that may be made from time to time by or on behalf of the Company or the Bank.

Financial Condition. Total assets of the Company were $414.3 million on September 30, 2026, an increase of $33.3 million or 8.7%, from $381.0 million on December 31, 2025.

Cash and cash equivalents, which consist primarily of interest-earning deposits, totaled $66.1 million on September 30, 2026, an increase of $34.5 million or 109.4%, from $31.6 million on December 31, 2025.

Cash and cash equivalents can fluctuate significantly on a day-to-day basis due to cash demands, customer deposit levels and loan and investment activity.

Investment securities, available for sale, decreased $1.7 million or 6.1%, to $25.4 million on September 30, 2026, from $27.1 million on December 31, 2025. The decrease in investment balances was the result of repayments. The Company recorded an unrealized loss on available-for-sale investment securities of $1.3 million on September 30, 2026, compared to a $852.0 thousand unrealized loss on December 31, 2025. The change was due to an increase in market interest rates. These amounts are included as part of the carrying cost of investment securities, available for sale, at each respective period.

The Bank is a member of the FHLBI and had a $2.6 million investment in stock of the FHLBI on September 30, 2026 a decrease of $25 thousand or 0.9%, from $2.6 million on December 31, 2025. Members are required to own a certain amount of stock based on the level of borrowings, participation in the FHLBI mortgage purchase program, and other factors. The investment is carried at par value, as there is not an active market for FHLBI stock.

Gross loans receivable totaled $309.1 million on September 30, 2026, an increase of $2.9 million or 1.0%, from the $306.1 million balance on December 31, 2025. Loans held for sale totaled $0 thousand on September 30, 2026, a decrease of $480 thousand or 100.0%, from the $480 thousand balance on December 31, 2025. The Company originated $24.1 million of loans held for sale which were subsequently sold during the nine month period ended September 30, 2026, as compared to $21.5 million during the prior year period. The increase in loan sales is primarily due to strong demand for mortgage loans despite the higher for longer rate environment. Loans originated for sale are fixed-rate, single-family mortgage loans, which are sold to manage interest rate risk and generate fee income.

The allowance for credit losses (ACL) is an estimate of the expected credit losses on the loans held for investment. Loan losses are charged against the ACL when management believes the uncollectibility of a loan balance is confirmed. Subsequent recoveries, if any, are credited to the ACL. The ACL methodology consists of measuring loans on a collective (pool) basis when similar characteristics exist. The Company has identified five loan portfolio segments and measures the ACL using the scaled CECL allowance for losses estimator (SCALE) method. The loan portfolios are construction and land real estate, commercial real estate, residential real estate, commercial, and other consumer loans. The SCALE method uses publicly available data from Schedule RI-C of the call report to derive the initial proxy expected lifetime loss rates. These proxy expected lifetime loss rates are then adjusted for bank-specific facts and circumstances to arrive at the final ACL estimate that adequately reflects the Bank's loss history and credit risk within the loan portfolio.

The qualitative factors considered for application to each loan portfolio consist of the impact of other internal and external qualitative and credit market factors as assessed by management through a detailed loan review, ACL analysis, and credit discussions. These internal and external qualitative and credit market factors include the following:

- Changes in lending policies and procedures, including changes in underwriting standards and collections, charge-offs, and recovery practices;
- Changes in national, regional, and local conditions;
- Changes in the nature and volume of the portfolio and terms of loans;
- Changes in the experience, depth, and ability of lending management;
- Changes in the volume and severity of past-due loans and other similar conditions;

- Changes in the quality of the Bank's loan review system;
- Changes in the value of underlying collateral for collateral-dependent loans;
- The existence and effect of any concentrations of credit and changes in the levels of such concentrations; and
- The effect of other external factors (i.e., competition, legal, and regulatory requirements) on the level of estimated credit losses.

The impact of the above-listed internal and external qualitative and credit market risk factors is assessed within predetermined ranges to adjust the ACL totals calculated. In addition to the pooled analysis performed for the majority of the Company's loan balances, the Company also reviews loans that have collateral dependency or nonperforming status, which requires a specific review of that loan, per the Company's individually analyzed CECL calculations.

The allowance for credit losses totaled $4.8 million on September 30, 2026, an increase of $1.3 million or 39.2%, as compared to $3.4 million on December 31, 2025. The Bank’s allowance for credit losses to total loans was 1.54% on September 30, 2026, as compared to 1.11% on December 31, 2025. Management believes that the allowance for credit losses is adequate to meet current expected losses in the portfolio. While management uses available information to recognize losses on loans, future additions to the ACL may be necessary based on changes in peer group information and loan portfolio conditions.

The following table sets forth the activity in the ACL for the nine months ended September 30, 2026, and 2025.

The activity in the allowance for credit losses, by loan segment, is summarized below for the nine months ended September 30, 2026, and September 30, 2025:

(Dollars in thousands) September 30, 2026	*Beginning Balance*	*Charge-offs*	*Recoveries*	*Provisions*	*Ending Balance*
Allowance for credit losses:					
Residential real estate.....	$ 925	$ -	$ -	$ (111)	$ 814

Risk Classification of Loans. The Company's policies, consistent with regulatory guidelines, provide for the classification of loans and other assets that are of lesser quality as substandard, doubtful, or criticized assets designated as special mention.

A substandard asset is inadequately protected by the current sound worth and paying capacity of the obligor or of the collateral pledged, if any. Assets so classified must have a well-defined weakness, or weaknesses, which jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the Bank will sustain some loss if the deficiencies are not corrected. Risk rating guidance clarifies that a loan with a well-defined weakness does not have to present a probability of default for the loan to

be rated substandard, and that an individual loan's loss potential does not have to be distinct for the loan to be rated substandard. An asset classified doubtful has all the weaknesses inherent in one classified substandard with the added characteristic that the weaknesses make collection or liquidation in full, based on currently existing facts, conditions, and values, highly questionable and improbable. Assets classified as loss are those considered uncollectible and of such little value that their continuance as assets is not warranted; such balances are promptly charged off as required by applicable federal regulations. A special mention asset has potential weaknesses that deserve management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the asset or in the institution's credit position at some future date. Special mention assets are not adversely classified and do not expose an institution to sufficient risk to warrant adverse classification.

Based on a review of the Company's classified assets, loans classified substandard as well as other real estate owned increased $5.7 million to $9.6 million on September 30, 2026, as compared to December 31, 2025.

Non-Performing Loans. Non-performing loans, which consist primarily of those nonaccrual loans which are past due ninety days or more as well as loans less than ninety days past due for which the collectability of principal and interest is in doubt, totaled $9.3 million, or 3.02% of total loans receivable at September 30, 2026, compared to $2.9 million, or 0.95% of total loans receivable at December 31, 2025.

Potential Problem Loans. The Company defines potential problem loans as performing loans rated substandard, which do not meet the definition of a non-performing loan. The Company does not necessarily expect to realize losses on potential problem loans but does recognize that potential problem loans carry a higher probability of default and require additional attention by management. As part of its loan review process, the Company evaluates a borrower's financial condition as well as the underlying collateral's cash flows to determine the appropriate loan grade/classification. The Company reviews nonresidential real estate loans, commercial business loans, and multiple non-owner occupied single-family loans made to the same borrower to determine if these loans should be classified. As a result of these reviews, no potential problem loans were classified as performing substandard on September 30, 2026, and December 31, 2025.

The ratio of allowance for credit losses to classified and criticized loans was 50.9% on September 30, 2026, compared to 117.0% on December 31, 2025.

Office properties and equipment totaled $8.8 million on September 30, 2026, a $143 thousand decrease from the balance on December 31, 2025. The decrease represents normal depreciation of $382 thousand, offset, in part, by additions totaling $295 thousand.

Bank owned life insurance decreased $53 thousand to $3.1 million on September 30, 2026. The change represents a decrease in the cash surrender value of the life insurance policies. The policies were purchased in connection with deferred compensation plans utilized by directors and officers of the Company.

Prepaid expenses and other assets increased $192 thousand to $1.9 million on September 30, 2026.

Total deposits increased by $29.9 million to $371.0 million on September 30, 2026. The increase in deposits during the period was due to a $1 million increase in savings accounts, a $6.2 million increase in money market accounts, and a $23.6 million increase in checking deposits, offset, in part by a $1.2 million decrease in certificate of deposits. At September 30, 2026, the Bank's core deposits (passbook, checking and money market accounts) comprised $286.3 million, or 77.2% of deposits, compared to $255.5 million,

or 74.9% of deposits, on December 31, 2025. Most of the Bank's deposits are derived from core client sources, relating to long-term relationships with local individuals, businesses, and municipal entities. The Company does not utilize brokered deposits.

Borrowed money, which consists of FHLBI advances, totaled $0 on September 30, 2026 and December 31, 2025. During the current period, the Company did not repay any advances. At September 30, 2026, based on the level of qualifying collateral available to secure advances, the Company had an unused borrowing capacity of $78.1 million. At September 30, 2026, the Company also had available $10.5 million of unsecured overnight federal funds borrowing capability from third party sources, and a $5.0 million line of credit with the FHLBI.

The Company's trust preferred subordinated debentures remained unchanged totaling $3.1 million on September 30, 2026. The interest rate payable on the debentures adjusts quarterly to the three-month SOFR plus 1.65% and was 5.81% on September 30, 2026. These debentures have a contractual maturity date of June 15, 2037, and the Company has the right to redeem the debentures, in whole or in part, on any interest payment date.

Other liabilities increased $890 thousand totaling $3.5 million on September 30, 2026, as compared to $2.6 million on December 31, 2025.

Total stockholders' equity increased $2.5 million to $36.7 million, or 8.86% of total assets on September 30, 2026, compared to $34.2 million, or 8.98% of total assets, on December 31, 2025. The increase in stockholders' equity was attributable to $2.9 million of net income for the nine-month period ended September 30, 2026, a $36 thousand increase in paid-in-capital, cash dividends of $189 thousand paid to common shareholders, a $320 thousand increase in the unrealized loss on available for sale securities, net of tax, and a $118 thousand decrease in treasury stock. The number of common shares outstanding on September 30, 2026, totaled 906,914 as compared to 890,659 at December 31, 2025. During the nine month period ended September 30, 2026, the Company repurchased 8,966 common shares at an average cost of $34.19 per share. The shares were retired as treasury stock. The book value per common share outstanding on September 30, 2026, was $40.48.

Comparison of the Results of Operations for the Quarter Ended September 30, 2026 and September 30, 2025

General. Net income for the quarter ended September 30, 2026, was $970 thousand, or $1.07 per diluted common share, an increase of $11 thousand or 1.1%, compared to $959 thousand, or $1.07 per diluted common share, for the same period in 2025. The increase in the current quarter net income compared to the prior year quarter was the result of a $506 thousand increase in net interest income, and a $349 thousand increase in non-interest income offset, in part, by a $156 thousand increase in non-interest expense and increased provision expense of $688 thousand.

Analysis of Net Interest Income. Net interest income represents the difference between interest earned on interest-earning assets and interest paid on interest-bearing liabilities. Net interest income is affected by the relative amounts of interest-earning assets and interest-bearing liabilities, and the interest rates earned or paid on them.

The following table presents, for the periods indicated, the total dollar amounts of interest income from average interest-earning assets and the resultant yields, as well as the interest expense on average interest-bearing liabilities, expressed both in dollars and rates. No tax equivalent adjustments were made. All average balances were calculated using average daily balances and include non-accruing loans.

Total liabilities	362,511			354,394		
Total stockholders' equity	36,899			32,492		
Total liabilities and stockholders' equity	$ 399,410			$ 386,886		
Return on average assets	0.97%			0.99%		
Return on average equity	10.52%			11.81%		
Net interest margin (average earning assets)	3.82%			3.41%		
Net interest spread	3.29%			2.83%		
Ratio of interest-earning assets to interest-bearing liabilities	1.25			1.24		

Net interest income for the three months ended September 30, 2026, was $3.7 million, an increase of $506 thousand (16.0%), compared to $3.2 million for the three months ended September 30, 2025. The weighted average yield on interest-earning assets was 5.90% for the three months ended September 30, 2026, compared to 5.85% for the three months ended September 30, 2025. The weighted average cost of funds for the three months ended September 30, 2026, was 2.61% compared to 3.02% for the three months ended September 30, 2025. The impact of the 5.90% return on interest-earning assets and the 2.61% cost of funds resulted in an interest rate spread of 3.29% for the three months ended September 30, 2026, an increase from the 2.83% spread for the three months ended September 30, 2025. The Company's net interest margin was 3.82% for the three months ended September 30, 2026, compared to 3.41% for the three months ended September 30, 2025.

Provision for (Release of) Reserve for Credit Losses. The Company recorded a $722 thousand provision for reserve for credit losses for the quarter ended September 30, 2026, as compared to a

provision for reserve for credit losses of $34 thousand for the prior-year quarter. The provision for (release of) reserve for credit losses is a function of the allowance for credit loss methodology used to determine the appropriate level of the allowance for inherent loan losses after adjusting for loan charge-offs and recoveries. Loan losses are charged-off against the allowance when it is believed that the loan balance, or a portion of the loan balance, is no longer realizable by the paying capacity of the borrower based on an evaluation of available cash resources and collateral value. Recoveries of amounts previously charged-off are credited to the allowance. The Company had no charge-offs or recoveries for the quarter ended September 30, 2026, compared to net recoveries of $9 thousand for the prior year quarter ended September 30, 2025.

Non-Interest Income. Non-interest income increased $349 thousand to $958 thousand for the quarter ended September 30, 2026, compared to prior year quarter due to the following changes:

(dollars in thousands)	Three Months Ended September 30, 2026	Three Months Ended September 30, 2025	QTD $ Change	QTD % Change
Non-interest income:				
Loan fees and service charges	$ 182	$ 144	$ 38	26.4%
Deposit related fees	82	88	(6)	-6.8%
Other fee income	4	2	2	100.0%
Rental Income	122	123	(1)	-0.8%
(Loss)/gain on sale of REO	289	0	289	100.0%
Gain on sale of loans	138	170	(32)	-18.8%
Increase in cash surrender value of life insurance	22	16	6	37.5%
Other gain - BOLI	18	-	18	0.0%
Other income	101	66	35	53.0%
Total non-interest income	$ 958	$ 609	$ 349	57.3%

Non-Interest Expense. Non-interest expense increased $156 thousand to $2.6 million for the quarter ended September 30, 2026, compared to prior year quarter due to the following changes:

(dollars in thousands)	Three Months Ended September 30, 2026	Three Months Ended September 30, 2025	QTD $ Change	QTD % Change
Non-interest expense:				
Staffing costs	$ 1,353	$ 1,339	$ 14	1.0%
Advertising	139	107	32	29.9%
Occupancy and equipment expense	312	296	16	5.4%
Data processing	335	304	31	10.2%
Professional fees	98	94	4	4.3%
Federal deposit insurance premiums	66	60	6	10.0%
Insurance expense	36	32	4	12.5%
Other operating expenses	265	216	49	22.7%
Total non-interest expense	$ 2,604	$ 2,448	$ 156	6.4%

Income Taxes. The Company recorded income tax expense of $338 thousand for the quarter ended September 30, 2026, resulting in an effective tax rate of 25.8%, compared to income tax expense of $338 thousand, for an effective income tax rate of 26.1%, for the prior year quarter. The lower effective rate is the result of higher tax-benefit income during the quarter.

Comparison of the Results of Operations for the Nine Months Ended September 30, 2026, and September 30, 2025

General. Net income for the nine months ended September 30, 2026, was $2.9 million, or $3.19 per diluted common share, an increase of $377 thousand or 15.1%, compared to $2.5 million, or $2.78 per diluted common share, for the same period in 2025. The increase in the current nine months net income compared to the prior year nine months was the result of a $1.7 million increase in net interest income, and a $598 thousand increase in non-interest income, offset, in part, by a $450 thousand increase in the non-interest expense, a $1.4 million increase in provision for credit loss expense, and a $122 thousand increase in income tax expense.

Analysis of Net Interest Income. Net interest income represents the difference between interest earned on interest-earning assets and interest paid on interest-bearing liabilities. Net interest income is affected by the relative amounts of interest-earning assets and interest-bearing liabilities, and the interest rates earned or paid on them.

The following table presents, for the periods indicated, the total dollar amounts of interest income from average interest-earning assets and the resultant yields, as well as the interest expense on average interest-bearing liabilities, expressed both in dollars and rates. No tax equivalent adjustments were made. All average balances were calculated using average daily balances and included non-accruing loans.

Total liabilities	346,232			344,872		
Total stockholders' equity	35,988			32,115		
Total liabilities and stockholders' equity	$ 382,220			$ 376,987		
Return on average assets	1.00%			0.88%		
Return on average equity	10.62%			10.33%		
Net interest margin (average earning assets)	3.83%			3.26%		
Net interest spread	3.31%			2.68%		
Ratio of interest-earning assets to interest-bearing liabilities	1.26			1.23		

Net interest income for the nine months ended September 30, 2026, was $10.6 million, an increase of $1.7 million (19.4%), compared to $8.8 million for the nine months ended September 30, 2025. The weighted average yield on interest-earning assets was 5.88% for the nine months ended September 30, 2026, compared to 5.75% for the nine months ended September 30, 2025. The weighted average cost of funds for the nine months ended September 30, 2026, was 2.57% compared to 3.07% for the nine months ended September 30, 2025. The impact of the 5.88% return on interest-earning assets and the 2.57% cost of funds

resulted in an interest rate spread of 3.31% for the current nine months, an increase from the 2.68% spread for the nine months ended September 30, 2025. The Company's net interest margin was 3.83% for the nine months ended September 30, 2026, compared to 3.26% for the nine months ended September 30, 2025.

Provision for (Release of) Reserve for Credit Losses. The Company recorded a $1.4 million provision for reserve for credit losses for the nine months ended September 30, 2026, as compared to a provision for reserve for credit losses of $42 thousand for the prior-year nine months. The provision for (release of) reserve for credit losses is a function of the allowance for credit loss methodology used to determine the appropriate level of the allowance for inherent loan losses after adjusting for loan charge-offs and recoveries. Loan losses are charged-off against the allowance when it is believed that the loan balance, or a portion of the loan balance, is no longer realizable by the paying capacity of the borrower based on an evaluation of available cash resources and collateral value. Recoveries of amounts previously charged-off are credited to the allowance. The Company had no charge-offs or recoveries for the nine months ended September 30, 2026, compared to net charge-offs of $56 thousand for the prior year nine months ended September 30, 2025.

Non-Interest Income. Non-interest income increased $598 thousand to $2.3 million for the nine months ended September 30, 2026, compared to the prior year nine months due to the following changes:

(dollars in thousands)	Nine Months Ended September 30, 2026	Nine Months Ended September 30, 2025	YTD $ Change	YTD % Change
Non-interest income:				
Loan fees and service charges	$ 505	$ 505	$ -	0.0%
Deposit related fees	246	265	(19)	-7.2%
Other fee income	17	6	11	183.3%
Rental Income	361	321	40	12.5%
(Loss)/gain on sale of REO	390	0	390	0.0%
Gain on sale of loans	435	377	58	15.4%
Increase in cash surrender value of life insurance	53	45	8	17.8%
Other gain - BOLI	18	-	18	0.0%
Other income	270	178	92	51.7%
Total non-interest income	$ 2,295	$ 1,697	$ 598	35.2%

Non-Interest Expense. Non-interest expense increased $450 thousand to $7.6 million for the nine months ended September 30, 2026, compared to the prior year nine months due to the following changes:

(dollars in thousands)	Nine Months Ended September 30, 2026	Nine Months Ended September 30, 2025	YTD $ Change	YTD % Change
Non-interest expense:				
Staffing costs	$ 4,041	$ 3,958	$ 83	2.1%
Advertising	294	288	6	2.1%
Occupancy and equipment expense	930	857	73	8.5%
Data processing	941	900	41	4.6%
Professional fees	332	244	88	36.1%
Federal deposit insurance premiums	248	195	53	27.2%
Insurance expense	85	88	(3)	-3.4%
Other operating expenses	733	624	109	17.5%
Total non-interest expense	$ 7,604	$ 7,154	$ 450	6.3%

Income Taxes. The Company recorded income tax expense of $982 thousand for the nine months ended September 30, 2026, resulting in an effective tax rate of 25.5%, compared to income tax expense of $860 thousand, for an effective income tax rate of 25.7%, for the prior year nine months. The increase in the current nine months income tax expense was impacted by a $499 thousand increase in net income before income taxes as compared to the prior year's period.

Capital Standards.

As a state chartered commercial bank, the Bank's deposits are insured up to the applicable limits by the Federal Deposit Insurance Corporation ("FDIC"). The Bank is a member of the Federal Home Loan Bank ("FHLB") of Indianapolis, which is one of the twelve regional banks comprising the FHLB system. The Bank is regulated by the FDIC and the State of Indiana Department of Financial Institutions. The Holding Company is regulated and examined by the Board of Governors of the Federal Reserve System ("FRB"). Such regulation and supervision establish a comprehensive framework of activities in which an institution can engage and is intended primarily for the protection of the insurance fund and depositors. The regulatory structure also gives the regulatory authorities extensive discretion in connection with their supervisory and enforcement activities. Any change in such regulation, whether by the FDIC, State of Indiana Department of Financial Institutions, the FRB or Congress could have a material impact on the Company and its operations.

In July 2013, federal bank regulatory agencies issued a final rule that revised the leverage and risk-based capital requirements and the method for calculating risk-weighted assets to make them consistent with agreements that were reached by the Basel Committee on Banking Supervision and certain provisions of the Dodd-Frank Act. Among other things, the rule establishes a Tier 1 leverage adequately capitalized ratio of 4.0% (well capitalized ratio of 5.00%), a risked-based common equity Tier 1 adequately capitalized ratio requirement of 4.50% (well capitalized ratio of 6.50%), a risked-based Tier 1 adequately capitalized capital ratio requirement of 6.00% (well capitalized ratio of 8.00%) and a risk-based total capital adequately capitalized ratio of 8.00% (well capitalized ratio of 10.00%). The final rule also required unrealized gains and losses on certain "available-for-sale" securities holdings to be included for purposes of calculating regulatory capital requirements unless a one-time opt-in or opt-out is exercised. The Bank elected to opt-out regarding the aforementioned. The rule limits a banking organization's capital distributions and certain discretionary bonus payments if the banking organization does not hold a "capital conservation buffer" consisting of 2.5% of common equity Tier 1 capital to risk-weighted assets in addition to the amount necessary to meet its minimum risk-based capital requirements.

This final rule became effective for the Bank on January 1, 2016, and continues to maintain the exemption of consolidated capital requirements for bank holding companies, such as the Company.

At September 30, 2026, the Bank was in compliance with all of its capital requirements as follows:

	September 30, 2026	
Well Capitalized Capital Requirement:	Amount	Ratio
